Platform for All

Marco Widjojo

Technopreneur
Jakarta, Jakarta, Indonesia

Summary

I am very passionate about technology and how technology can transform people or corporations wellbeing. That's the reason my business partners and I create SALT to assist corporations by transforming their digital technology especially for marketing. This approach aligns with my personal vision which is to touch everyone's lives (especially Indonesian) and improve their wellbeing with the help of technology.

Having graduated from UTS Australia and completed MBA studies from AGSM, UNSW Australia gives lots of technology and businesses experience.

My dream is for Indonesia to become ahead of other countries in their technology usage and understanding. At least on par with other developed countries.

Being a technology entrepreneur sure have its ups and down. I, myself is still learning and always be learning to become more successful everyday. My suggestion is to embrace both its ups and down because that's what made us which are more resilient, more compassionate and always thinking forward.
