Feris Thia

Help Business extract, see and understand Data as Crucial Information
Jakarta, Indonesia

Summary

I help organizations transform complex data into clear, actionable insights. As Chief Technology Officer of Xeratic, I lead the development of enterprise-grade data platforms and AI solutions for regulated industries such as banking, insurance, government, and manufacturing.

With over 18 years of experience in Data Engineering, AI, and Digital Product Development, I've delivered solutions that handle billions of records, accelerate decision-making, and ensure data compliance.

My track record includes building:

- LinkR (Data Cleansing & Integration) — streamlining messy, multi-source data.
- XellR (Analytics & Machine Learning) — turning data into predictive insights.
- AI-powered Learning Assistants and RAG-based analytics for real-time, context-aware decision support.

I'm also the co-founder of DQLab.id, an online learning platform with 400,000+ members, empowering business users and professionals to upskill in Data Science and AI.

Specialties: AI Engineering (LLM, RAG, Prompt Engineering), Big Data Architecture (Hadoop, Spark, Cloudera), Data Warehouse & Optimization (PostgreSQL, MSSQL, MySQL, Oracle, BigQuery), ETL & MDM, Product Development, Data Storytelling, and On-Premise AI deployment.

Experience

Xeratic
Founder and Chief Technology Officer
November 2015 - Present (10 years 10 months)

Greater Jakarta Area, Indonesia

Lead end-to-end architecture and delivery of AI-powered data solutions for enterprise clients.

- Architected AI-driven learning systems integrated into client workflows, improving response times and user engagement by up to 70%.
- Delivered data platforms processing billions of rows for government and financial institutions with performance gains exceeding 90,000% - yes, you read it right. In extreme case, from 14 minutes to under 1 second.
- Led AI product innovation including OCR automation, on-premise AI with model host app like OpenShift AI or Ollama, and retrieval-augmented - RAG based analytics.

Key clients: Kementerian BUMN, BTPN Konven, BTPN Syariah, PT Dima Indonesia, Otoritas Jasa Keuangan (JK), BNI Life, DQLab.id, Biofarma, PT Knitto Tekstil Indonesia, PT Infovesta Utama, UMN AI Training Center, etc.

Universitas Multimedia Nusantara

Big Data Research & Development Lead

September 2013 - April 2017 (3 years 8 months)

Tangerang

Led research, development, and implementation of data-driven technologies, bridging academia and industry to advance Big Data and AI adoption.

Key Responsibilities & Achievements:

- Directed R&D Initiatives in Data Mining, Text Mining, Information Retrieval, and Distributed Computing, producing prototypes and frameworks for large-scale data processing.
- Co-developed the DQLab.id online learning platform — now empowering 400,000+ learners — including curriculum design, interactive learning modules, and assessment systems.
- Integrated real-world datasets and industry case studies into learning modules, giving students hands-on exposure to complex data challenges.
- Established collaborations with industry partners to incorporate enterprise-level tools (Hadoop, Spark, Pentaho) and datasets into UMN's curriculum.
- Guided students and research assistants in applying Big Data technologies to solve business problems, including predictive analytics, data visualization, and process optimization.
- Delivered workshops and guest lectures for UMN's Data Science programs, increasing student engagement and industry relevance.

PT. Putera Handal Indotama (PHI-Integration.com)

Data Warehouse Specialist

July 2006 - September 2013 (7 years 3 months)

Provide consultancy and implementation in:

- Data Warehousing with Multi-Dimensional Modelling (MDM)
- Online Analytical Processing (OLAP) technology design and deployment
- Multi-Dimensional Expressions (MDX) query development for advanced analytics
- Data Mining and Machine Learning implementation for predictive insights
- Information Retrieval systems for large-scale data environments
- Hadoop MapReduce solution architecture and implementation

Technologies & Tools:

Microsoft BI • Pentaho Data Integration • Hadoop (Native & Cloudera based)

Multimatics ID

Professional Trainer

March 2006 - September 2008 (2 years 7 months)

Trainer / Instructor on the following subjects

- Java Programming
- Microsoft SQL Server Database Server
- Microsoft ASP
- Linux (Fedora, CentOS, Ubuntu)
- PHP Programming
- MySQL Database Server

BINUS CENTER

Professional Trainer (Programming Language)

2003 - 2006 (3 years)

Jakarta

Delivered engaging, hands-on training programs for students and professionals, equipping them with the technical skills needed to excel in software development and IT infrastructure.

Core Training Subjects:

- Java Programming – Object-oriented programming fundamentals and enterprise application development.
- Microsoft SQL Server – Database design, querying, and performance optimization.

- Microsoft ASP – Web application development using ASP and related Microsoft technologies.
- Linux Administration – Server setup, configuration, and management on Fedora, CentOS, and Ubuntu.
- PHP Programming – Dynamic web application development and database integration.
- Web & JavaScript Programming – Building interactive, responsive front-end experiences.

Highlights:

- Designed curriculum tailored to learners' skill levels — from beginners to advanced professionals.
- Delivered practical, project-based sessions to ensure immediate skill application.
- Mentored learners on best practices, enabling them to transition into real-world development roles.

iForte Solusi Infotek

Axapta Developer

2001 - 2004 (3 years)

Jakarta

Responsible for developing Navision Axapta modules using X++ and creating add-on applications in Visual Basic 6 for integrated surrounding systems.

Key Projects:

- Multi-Level Marketing Calculation Module – Sophie Martin Paris. Develop efficient tree complex traversal to calculate bonus for every member in multi level structure.
- Tax Module – PT Nitto Alam Indonesia
- Connectivity/API-Based Modules – Integrating Axapta Navision sales and inventory systems

Education

Founder Institute

Graduated - Jakarta Spring 2013, Data Analytic Startup · (2013 - 2013)

BINUS University

Bachelor of Science - BS, Computer Science

SMA Sutomo 1
