

DARIS CAHYO ADI

Students of PENS, majoring in Mechatronics Engineering, are adept at manufacturing electronic and mechatronic systems. Demonstrates in-depth knowledge of rocket and satellite technology. Experience manufacturing and launching and **ROCKET & CANSAT** through independent and organizational projects and competitions. Experience in student council organization and founding and leading the first rocket team in Indonesia to participate in international competitions. Passionate about starting a career in space technology.

EDUCATION

SMKN 4 PONTIANAK (Industrial Electronical Engineering)

2022 - 2025

Politeknik Elektronika Negeri Surabaya (Mekatronics Engineering)

2025 - PRESENT

EXPERIENCE

DRS MENGANGASA - COMPETITION TEAM ORGANISATION

January 2026 - PRESENT

Founder & Technical Advisor

- Founded and initiated the establishment of the first amateur rocket team in Eastern Indonesia.
- Collaborated with local schools and the regional Department of Education to establish and develop the team.
- Led the planning and development of an amateur rocket launch initiative in Eastern Indonesia.
- Provided technical mentorship and guidance to prepare the team for a rocket competition in Malaysia.

EPIISAT MENGANGASA - COMPETITION TEAM ORGANISATION

February 2026 - PRESENT

Team Initiator & Leader of Technical Field

- Initiated the establishment of a team focused on rocket technology research and development.
- Led the structural design and mechanical development of rocket systems.
- Conducted rocket flight simulations to evaluate performance and stability.
- Performed structural stress analysis to ensure the rocket's safety and reliability.
- Prepared technical documentation and competition reports in accordance with competition requirements.

BAMANTARA EPIISAT - COMPETITION TEAM ORGANISATION

September 2026 - PRESENT

R&D Division

- Conducted research and development (R&D) on a CanSat system for participation in the 2026 CanSat Competition.
- Achieved 3rd Place Worldwide in the 2026 CanSat Competition.

SKILLS

- Hard Worker
- Public Speaking
- Teamwork
- Leadership
- Critical Thinking
- Time Management
- Public Relations
- Effective Communication
- Problem Solving
- Strategy Analyst
- Project Management
- 3d Modelling
- Programming
- PCB Designer

EXPERIENCE

R&D Indonesia's First Amateur Rocket - INTERNSHIP PROGRAM

October 2024 - March 2025

Structure Concept & Avionics Engineer

- Preparing project plans, from administrative to technical.
- Designing the rocket as well as the technical design of the rocket to be built.
- Calculate the rocket design and simulate it.
- Introducing and explaining the rocket design to the director of PT Pasifik Satelit Nusantara and KASAU (Chief of Staff of the Air Force).
- Development and construction of test and launch facilities for amateur rockets.
- R&D of rocket avionics and control systems.

AXANTERA INDONESIA - COMPETITION TEAM ORGANISATION

December 2023 - Present

Founder & Leader

- Founded and led the team, defining its vision, organizational structure, and strategic goals.
- Built partnerships with schools, industry partners, and government agencies to support team development.
- Served as the primary liaison with the National Research and Innovation Agency (BRIN) for technical mentorship and collaboration.
- Led the team in one of the world's largest amateur rocket competitions.
- Coordinated the development of the Preliminary Design Report (PDR) and Critical Design Report (CDR).
- Provided technical leadership and coordinated multidisciplinary teams.
- Secured sponsorships and managed fundraising to support the project.
- Led the team to win a Gold Medal at the Malaysian Rocket Competition.

Make a concept of Industrial Space in Indonesia - COMPETITION

April - August 2023

- Produce a report in the form of an executive summary and business proposal to illustrate the concept and outline Indonesia's potential in space.
- Proficient in working on the design, structure, propulsion and electronic systems on rockets.
- Present a SWOT of the space industry business in Indonesia, and describe the prototype rocket created.
- Successfully launched a prototype rocket and small satellite.
- Calculated the current and future costs and disadvantages of the industry.

Development High Power Rocket - TEAM PROJECT

December 2022 - March 2023

Team Leader

- Led the project as the Project Coordinator, ensuring effective team collaboration and project execution.
- Mentored team members in rocket design, manufacturing, and system integration.
- Applied composite materials in the design and fabrication of rocket structures.
- Developed microcontroller-based avionics systems for flight control and monitoring.
- Coordinated multidisciplinary teams to achieve project objectives efficiently.

Sugar-Fuelled Rocket Experiment - COMPETITION

October - November 2022

Team Leader

- Estimated project requirements, including tools, materials, and budget, from planning to completion.
- Successfully launched the rocket and won the competition.
- Developed the first solid-propellant rocket in our city.
- Conducted experiments to optimize the chemical composition of solid rocket propellant.
